

# MicroTITE™

## ·Micron Vacuum Manifold·

“Your Partner for a Perfect Vacuum”

### FEATURES:

- Takes ANY possibility of service tool air inlet leakage “out of the loop”.
- Stand-a-alone vacuum manifold for increased productivity - won't tie up your service manifold for evacuation process.
- Fully isolates piping from external permeation sources—takes out ANY soft leak potential: bad O-rings, hoses etc.
- Tested to 1000PSI and 10microns to ensure *thorough* vacuum process—guarantees device reliability & accuracy.
- Achieves  $\leq$ /= 50 microns.
- Accommodates any standard micron gauge.
- High/volume vacuum capable.
- Adapts to all equipment access valves—easy high and low port connections.
- No valve-packing leak potential—eliminates any service valve seepage (no moving parts)
